CATALOGO GENERALE

GENERAL CATALOGUE • CATALOGUE GÉNÉRAL • GESAMTKATALOG

Grazie ad una costante e continua crescita ci presentiamo oggi alla nostra clientela come azienda leader, nel settore dell'auto attrezzatura e non solo, a livello internazionale, con strutture produttive su una superficie coperta di 60.000 mq ed un'area globale di 100.000 mq.

Al fine di poter realizzare prodotti di qualità assolutamente controllata e garantita, abbiamo deciso di seguire un percorso produttivo a 360° partendo cioè dalla materia prima per giungere al prodotto finito sia per quanto riguarda tutti i componenti meccanici, che quelli idraulici e questo vale per tutta la gamma dei nostri prodotti, rappresentata da oltre 600 articoli omologati e certificati CE. Siamo impegnati in una costante attività di ricerca e sviluppo per offrire prodotti tecnologicamente avanzati, affidabili e sicuri sotto ogni aspetto, tutti ideati, progettati e fabbricati internamente. I nostri apparecchi sono conformi alle direttive europee quali la Direttiva Macchine 2006/42/CE, la Direttiva 2006/95/CE (bassa tensione), la Direttiva 2004/108/CE (compatibilità elettromagnetica). Oltre a ciò ogni nostro singolo articolo è sviluppato e realizzato applicando, su base volontaria, specifiche norme internazionali di prodotto. In particolare tutti i ponti sollevatori da noi commercializzati risultano conformi ed omologati rispetto alla norma europea EN 1493 - Vehicle lifts. Per garantire tutto ciò i nostri tecnici interni mantengono contatti continuativi con enti normativi internazionali, organismi di certificazione (Bureau Veritas, Tuv, Icepi, Apave Normande) e vigilanza e con primarie società di consulenza. Abbiamo inoltre inserito, nell'ambiziosità dei nostri progetti, una assoluta volontà di lasciare un'impronta che conta del "Made in Italy" di qualità garantita. La nostra radicata e capillare presenza sul mercato nazionale e quella in oltre 100 stati esteri, crediamo possano essere la nostra migliore credenziale. Una strutturata e professionale rete di assistenza ed un'importante copertura assicurativa "RESPONSABILITÀ PRODOTTO" valida per 10 anni su tutti gli articoli di nostra produzione, sono i complementi del nostro concetto di qualità.

Thanks to a constant and continue growth, today we introduce ourselves to our customers as a leader company in garage equipment and not only, on an international level, with productive structures on a covered area of 60.000 m² and a global area of 100.000 m².

To realize products of absolutely tested and guaranteed quality, we decided to follow a productive process at 360°, starting from the raw material till the completed product, both for mechanical parts and hydraulic parts; this is referred to all our products, composed by more than 600 CE approved and certified articles. We are engaged in a continuous research and development activity to offer technologically advanced, reliable and safe products each conceived, designed and manufactured inside our company. Our machines comply with the European directives like the Machinery directive 2006/42/CE, the directive 2006/95/CE (low voltage) as well as the Directive 2004/108/CE (electromagnetic compatibility). In addition to this, every single article of our product range has been developed and manufactured following voluntarily the specific international norms concerning this product. In particular, all of our commercialized lifts are homologated and comply with the European norm EN 1493 - Vehicle lifts. In order to comply with these norms, our technicians are continuously in contact with some international regulatory authorities, with certification authorities like Bureau Veritas, Tuv, Icepi, Apave Normande as well as with top consulting companies. We also put in our ambitious projects an absolute will to keep a relevant sign of the “Made in Italy” of guaranteed quality. Our deep and extended presence on a domestic market and in more than 100 foreign countries, we believe, can be our best reference.

A well organized and professional network of assistance and an important insurance cover “PRODUCT RESPONSIBILITY” valid for 10 years on all the articles of our production are the complements to our concept of quality.

Nous sommes une société leader au niveau international dans le secteur de l'équipement industriel et de garage, dotée d'unités de production couvertes de 60.000 m² pour une superficie globale de 100.000 m².

Pour atteindre notre objectif de réaliser des produits de qualité contrôlée et garantie, nous avons opté pour un parcours à 360°, en partant de la matière première pour aboutir au produit fini. Nous appliquons ce principe à tous nos composants mécaniques et hydrauliques et à toute notre gamme de produits, qui s'élève à 600 articles aux normes CE. La branche recherche et développement de OMCN est en activité constante pour offrir toujours des produits à la pointe de la technologie, fiables et sûrs sous tous points de vue, tous conçus, réalisés et fabriqués en interne. Nos machines sont conformes aux directives européennes telles que la Directive Machines 2006/42/CE, la Directive 2006/95/CE (basse tension), la Directive 2004/108/CE (compatibilité électromagnétique). De plus, nous choisissons d'appliquer volontairement certaines normes internationales spécifiques de produit à chacun de nos articles. En particulier, tous les ponts élévateurs que nous commercialisons sont conformes et homologués selon la norme européenne EN 1493 - Vehicle lifts. Pour garantir tout cela à nos clients, nos techniciens en interne, sont toujours en contact avec les instituts d'homologation internationaux, organismes de certification (Bureau Veritas, Tuv, Icepi, Apave Normande) et de vigilance, ainsi qu'avec des sociétés de conseils de tout premier plan.

Ambitieux dans nos projets, nous souhaitons laisser une empreinte de qualité garantie "Made in Italy". Notre importante représentation sur le marché national et dans plus de 100 pays dans le monde entier est notre meilleure carte de visite.

Une structure solide, un service après-vente d'un grand professionnalisme et une importante couverture "RESPONSABILITE PRODUIT" valable 10 ans sur tous les articles de notre gamme sont les compléments de notre idée de qualité.

Dank eines beständigen und anhaltenden Wachstums zählt OMCN mit einer Produktionsfläche von 60.000 m², weltweit insgesamt 100.000 m² heute zu den führenden Herstellern von Kfz Werkstattausrüstungen und nicht nur in der Welt.

Um Produkte in erstklassig garantierter Qualität herstellen zu können, unterliegen alle OMCN-Erzeugnisse vom Wareneingang des Rohmaterials bis hin zum fertigen (mechanischen oder hydraulischen) Produkt ständig umfangreichen Qualitätskontrollen. Dies gilt für alle OMCN-Produkte und wird durch mehr als 600 "Ce"-Zertifizierungen belegt. Wir sind in einem ständigen Forschungs- und Entwicklungstätigkeit eingesetzt, um technologisch fortschrittliche, sichere und zuverlässige Produkte zu bieten, die innerhalb des Unternehmens ausgedacht, entworfen und hergestellt sind.

Unsere Geräte sind den europäischen Richtlinien, wie die Maschinen Richtlinie 2006/42/CE, die Richtlinie 2006/95/CE (Niederspannungsrichtlinie) sowie die Richtlinie 2004/108/CE (Elektromagnetische Verträglichkeit) entsprechend. Darüber hinaus wird jeder einzelne unserer Artikel entwickelt und umgesetzt, auf freiwilliger Basis, um allen internationalen Richtlinien zu entsprechen. Insbesondere, sind alle Hebebühne, die wir vermarkten, der Europäische Richtlinie EN 1493 - Vehicle lifts entsprechend und zugelassen.

Um dies sicherzustellen, halten alle unsere Technikern laufenden Kontakte mit internationalen Regelungsbehörden, mit Produktzertifizierung und Aufsicht Stellen (wie Bureau Veritas, Tüv, Icepi, Apave Normande) sowie mit wichtigen Beratungsgesellschaften.

Ein gut und professionell organisiertes Händlernetz und eine wichtige, für einen Zeitraum von 10 Jahren gültige "PRODUKTHAFTUNGS-GARANTIE" für alle OMCN-Produkte, sind die Vervollständigung unseres Qualitäts-Begriffes.
